

70.7V 60-Watt High-Quality Transformer

T18

SKU: 25119 UPC: 612079180783

AtlasIED Model T-18 is a line matching U-frame, varnish-impregnated transformer. High efficiency unit reduces line loss when long transmission cables interconnect amplifier and speakers and when two or more speakers are connected to a common amplifier source. Unit features element-resistant components and clearly identified terminals for solder connection.

Features

- 2.5, 5, 10, 20, 40 and 60 Watt Taps, 4, 8 and 16 Ohm Secondary
- 60 Watt 70.7V Line Transformer
- High Power Rating is Perfect for Use with Compression Driver Horns in High Noise Environments
