

1 X 120W Drivecore Amplifier Fanless 4 /8 /70V/100V

CSA1120Z

SKU: 103159 UPC: 871015008325

By combining years of innovation, invention and insight from HARMAN brands, JBL Commercial Series Amplifiers (CSA) go well beyond the expected in generating powerful sound.

The efficient performance of Crown's DriveCore Technology continues to set new standards in commercial power amplifier technology.

Simple to configure, the Commercial Series amp provides a DriveCore-based sound solution. This replaces up to 500 parts with one small chip, significantly reducing the part count and increasing reliability while maintaining superb performance.

Supporting 70V and 100V installations out of the box, Commercial Series amps include RJ45 connectors for use with JBL CSR-V in-wall volume controls.

And with HARMAN's GreenEdge environmental initiative, Commercial Series amps quickly pay for themselves in energy savings.

Features

- 1 or 2 channels X 300W output
- Built-in 70V and 100V
- Space-saving 2 RU design
- Sleep mode disable function
- Energy-efficient amplifier
- Sleek industrial look with illuminated rings making knobs easy to see and use
- Supports JBL CSR-V wall controller via CAT5 cable with RJ45 connectors
