Resideo VISTA 15 Pack

V15PACK

SKU: 62087    UPC: 781410441064

Honeywells versatile VISTA-15P is the ideal choice for any residential installation. VISTA-15P gives you the ability to send alarm signals and upload/download via an Internet Protocol (IP), improving the speed at which information can be delivered to and from the control panel. In addition, when used with an AlarmNet Internet or 4G communicator, the VISTA-15P can be installed in premises without TELCO lines. Hardwired expansion, graphic keypad support, two-wire smoke detectors, scheduling options and a host of end-user and installer features separate the VISTA-15P from all other six-zone panels - offering you and your customers the most panel for the dollar.
